Hiring Team

DLytica Nepal Pvt Ltd

Bhagawati Bahal, Naxal

Subject: Application for Data Engineer Intern Position

Dear Hiring Team,

I am excited to apply for the Data Engineer Intern position at DLytica. As a Computer Engineering student at Tribhuvan University with a strong foundation in data analytics and software development, I am eager to contribute my skills to a company at the forefront of data-driven innovation.

My academic journey and hands-on experience have equipped me with proficiency in SQL, Python, and data engineering tools. I recently worked on a project involving MongoDB and integrating databases for a seamless user experience. This experience honed my ability to design, develop, and optimize data pipelines—key responsibilities for this internship. Additionally, I hold an AWS Cloud Foundations certification, which has enhanced my understanding of cloud computing and its applications in modern data engineering practices.

In addition, I have explored machine learning and data processing frameworks, which have deepened my understanding of scalable data solutions. I am particularly drawn to DLytica's focus on analytics and AI and believe my skills align perfectly with your mission to harness data for impactful decision-making.

I am enthusiastic about collaborating with a talented team to solve real-world challenges and gain invaluable experience in a fast-paced environment. Thank you for considering my application. I would be delighted to discuss my qualifications further in an interview.

Sincerely,

Aavash Baral
